NEW FOR 2010!

Advanced Massage and Rehabilitation Seminar Series

These seminars have been developed to further your understanding of common chronic conditions and sport injuries. You will learn how to accurately identify conditions and treat them with confidence.

I will show you the most effective techniques that have been used by soft tissue therapists and medical professionals for years. We will also discuss rehabilitation options, such as strengthening, stability, nutrition, neural facilitation, etc.

The seminar will consist of both lecture and practical instruction, including hands-on practicum on trained instructors.
